

ADVANCED Exagus

An advanced gastric support formula to assist with maintaining optimum gut function and health

Equine

Digestion

Pellets

- Assists maintenance of optimum gut function & health
- Suitable for all horses & foals
- Ideal for horses during intense training, competition or rehabilitation
- Promotes healthy digestion & absorption of nutrients in feed
- Suitable for short & long term use
- Competition Safe (UK)

ADVANCED GASTRIC SUPPORT FORMULA

- ✓ **Calcium Carbonate & Magnesium Hydroxide** - alkaline buffers to support the elevation of gastric PH.
- ✓ **Pectizone®** - a scientific blend of Pectin, Lecithin and Fructo-oligosaccharides (FOS) prebiotics. Pectin acts with lecithin to form a hydrophobic barrier on the gastric mucosal membranes, assisting in reducing the impact of gastric acid in the glandular section of the horses stomach. FOS assists with stimulating good bacteria and supporting intestinal efficiency.
- ✓ **Sodium Alginate** forms a gelatinous barrier to reduce the impact of acidic stomach contents on the non-glandular section of the stomach.
- ✓ **Amino Acid - Glutamine Peptides** is a bonded and highly absorbable amino acid which aids the production of intestinal epithelial cells, supports optimal intestinal performance and is essential in the repair and production of epithelial cells.
- ✓ **Amino Acid - Threonine** aids intestinal mucin synthesis and gut barrier function.

SQUAMOUS & GLANDULAR SUPPORT
